SUMMARY

I'm a self-taught frontend developer currently on a study break from medicine, diving deep into the world of web development. Passionate about building clean, interactive UIs using tools like React.js, Tailwind CSS, and GraphQL. I enjoy learning by doing building mini-projects, following roadmaps, and exploring how frontend connects with backend through Node.js. Combining the discipline from my medical background with a new creative drive in tech, in hopes of making the world a more convenient and better place.

SKILLS

Frontend:

- HTML5, CSS3, JavaScript (ES6+), DOM Manipulation
- React.js (Basic Components, useState, useEffect)
- Tailwind CSS (Dark mode, custom styles)
- BEM Methodology

Backend:

- Node.js (Basic usage, npm, understanding runtime environment)
- Express.js (Learning phase)
- Java (Basic understanding)
- GraphQL (Learning basics)

Environment:

- Git & GitHub (Repository management, commits, branches)
- VS Code (Extensions, snippets, debugging)
- NPM (Installing packages like React, Tailwind, Vite)
- Vite (React app starter tool)

PROJECTS

- **Weather App UI:** React + Tailwind CSS + API
- **Anime Quiz Game:** React + CSS + API
- **Netflix Clone UI:** HTML/CSS + React + API
- **Currency Converter:** JavaScript + React + Tailwind CSS + API

EDUCATION

Wesley Methodist School, Sentul — **Graduated 2021**

- IGCSE – 10 A*/A

International Medical University (IMU) — **April 2022 - April 2023**

- Foundation in Science CGPA 3.95

International Medical University (IMU) — **April 2023 - Current**

- Bachelor of Medicine and Bachelor of Surgery (MBBS)
- 3rd Medical Student

ADDITIONAL INFORMATION

- **Typing Skills:** Fast Typing Speed (140 Words per min) – Efficient in coding and communication
- **Fast learner:** Curious about tech systems
- **Self-motivated:** follow roadmaps and tutorials consistently
- **Loves Critical Thinking:** Breaking down complex problems to bite size pieces
